

Supply Chain Advisor

- Can your business handle a supply chain disruption?
- Are your suppliers meeting your company's operational and financial commitments?
- What is the risk to your bottom line from single sourced, global suppliers?
- Does your supplier's communications and performance inspire confidence?

When analyzing whether your Supply Chain can withstand a crisis, it needs to be examined from not only an operational perspective but from multiple angles: Capability, Capacity, Competency and Transparency.

- Supply Sources & Relationships (1st tier, 2nd tier)
- Material Flow and Inventory Management
- International Transportation and Domestic Routes
- Supplier Development (Quality, Delivery)
- Single/Sole Sourced supply solutions
- Planning and Scheduling
- Lead Times and Distribution
- Manpower and Resources

Lean into a resilient supply chain.

Our process focuses on understanding your Supply Chain's vulnerabilities and identifying what actions to take to improve resiliency. Developing a strategic understanding of your current Supply Chain along with engaging critical stakeholders such as your extended suppliers is critical to fostering transparency, collaboration, cooperation, planning, and continued operations.

Byrkit Point Supply Chain Advisors is a leading provider of advisory services in supply chain risk assessment & management, continuity of supply stabilization, strategic sourcing, and global materials management.

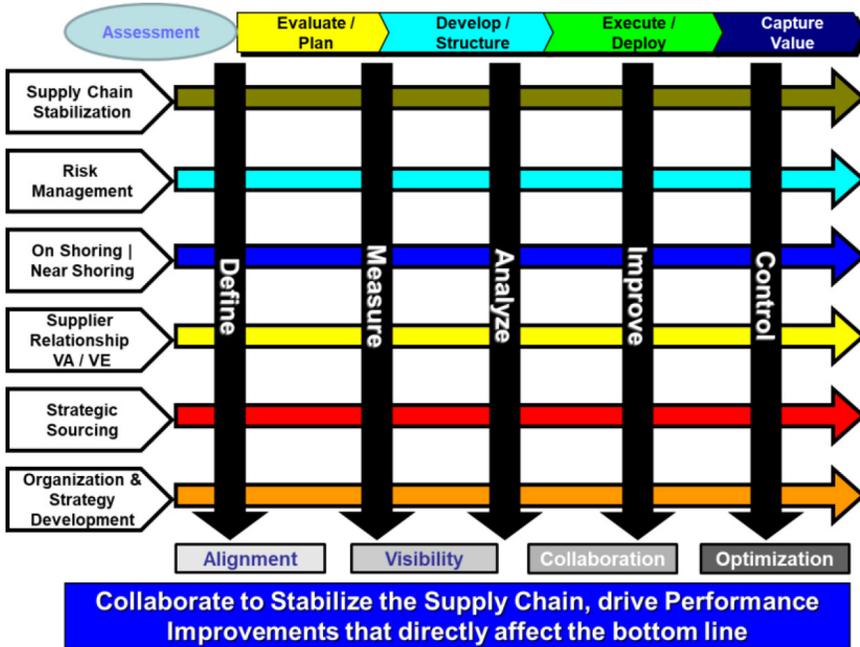

Supply Chain organizations need to manage the urgent continuity of supply issues while delivering "run the business" objectives to drive their company's success. We can help companies with:

- **Risk Assessment and Mitigation Action Plan development:**
Using key indicators to identify potential issues and develop rapid response action plans.
- **Rapid Response Supply Chain Stabilization:**
Provide preventative and corrective countermeasures with action plans.
- **Results Driven Strategic Sourcing | Commodity Management:**
Using a structured, cross functional process, facilitate the identification, selection and development of regional, global and near shore supply solutions.
- **Build a Resilient Supply Chain:**
Resulting in stronger, more aligned sourcing solutions to support operational and financial business requirements.
- Drive short and long-term improvement in costs and earnings while building best practices.

Our disciplined approach has led to a solid track record with proven ROI results.

We work with all levels of your organization to identify the Gaps, Mitigate the Risks, Create Stabilization, Build Capabilities, and Ensure Sustainability.

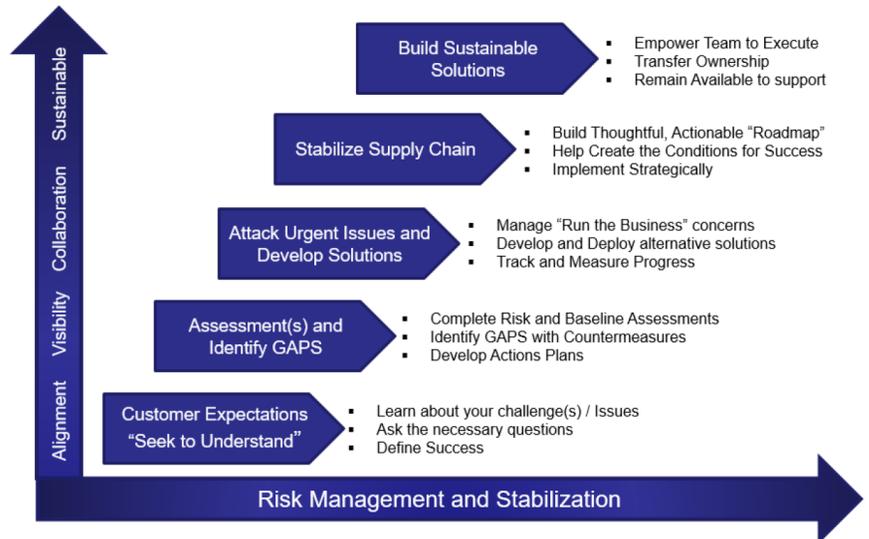

OUR APPROACH

We clearly and logically lay out the scope of solutions using proven methodologies, which will in turn ensure continuity of supply and improve your bottom line.

OUR PROCESS

Our success is measured by meeting expectations, closing gaps, delivering ROI results with customer facing impacts and receiving positive feedback from our clients.
