

# LEAN SIX SIGMA CERTIFICATIONS BLACK BELT | GREEN BELT | YELLOW BELT

Intensive and disciplined approach to reduce costs and minimize waste

If your company struggles with high variability/scrap, recurring issues, or inefficient business processes, Lean Six Sigma could be the solution you've been searching for. Lean Six Sigma Certification contains proven methods to minimize waste and reduce costs.

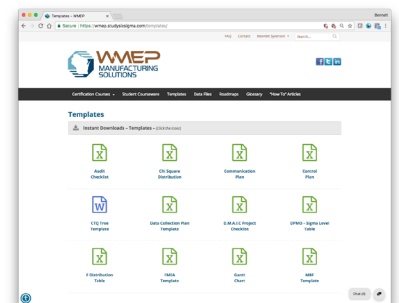

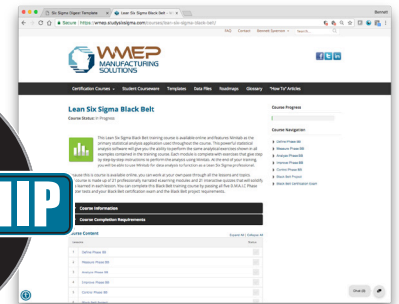

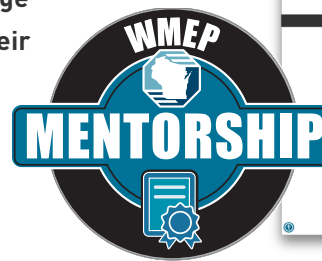

## Lean Six Sigma is proven to reduce costs

Graduates of Lean Six Sigma Certification have seen an average reduction of approximately \$50,000 (at Green Belt level) in their company's cost of manufacturing.

Learn how to apply Lean Six Sigma techniques and develop a solid continuous improvement plan for your company.

Unlike other courses, WMEP's program gives you the opportunity to work through your own company's process and immediately begin applying these techniques as you learn.

## WMEP's blended learning model highlights:

- ▶ The series includes eight sessions of in-class training by Certified Master Black Belt and Black Belt trainers. These trainers provide expert mentorship and use this time to talk through the participant's individual projects and ensure everyone understands which tools to use throughout their current or future projects.
- ▶ Provided learning materials include: a training guide text book (all), lifetime access to WMEP's online Six Sigma eLearning modules that provide a resource for tools, templates, test study materials and certification test taking (accredited option).
- ▶ Six Sigma Green Belt candidates are required to lead a real-world Six Sigma project that is properly scoped to be completed within four months and has an appropriate level of financial impact to their organization.

## Talent development and increased contributions:

- ▶ Participants learn to identify and lead both projects and other team members to increase their contributions and value to the organization.

Contact us for dates of upcoming public courses, in-house training, or self-paced mentoring.

# Graduates of WMEP-Mentored Lean Six Sigma training have seen an average reduction of approximately \$50,000 (Green Belt level) in their company's cost of manufacturing.

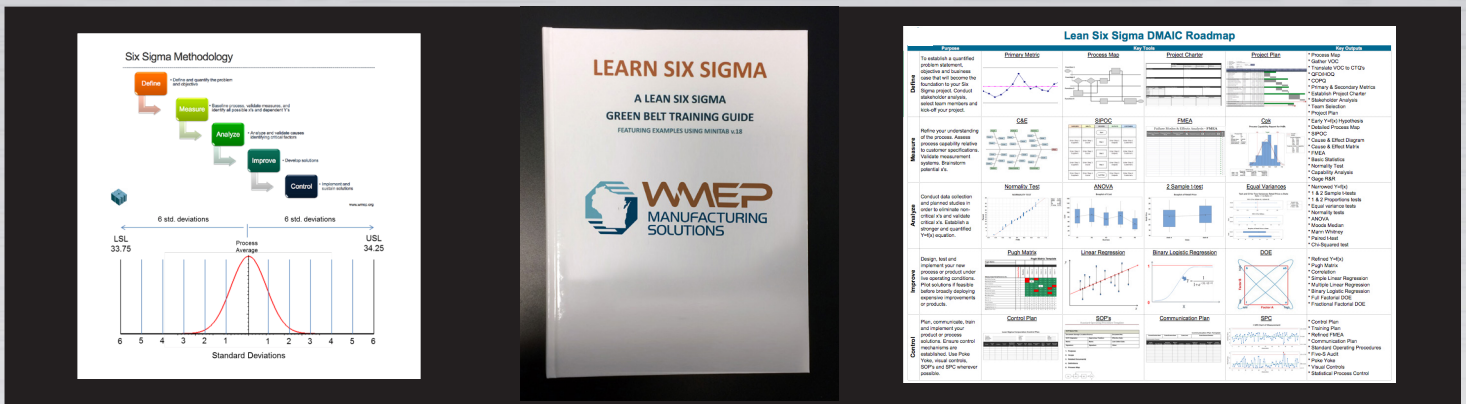

Learn how to apply Lean Six Sigma techniques and develop a solid continuous improvement plan for your company. Unlike other courses, WMEP's program includes personalized mentoring and gives you the opportunity to work through your own company's process to immediately begin applying these techniques as you learn.
